

Important Notice for preventing COVID-19 at Uji Campus

(For Workers)

In response to the surge in COVID-19 contracted cases in Japanese megacities, Uji campus has set up a response team and mapped out Uji campus's course of action for all Uji campus members to follow. Please review the following measures and act accordingly and responsively.

Please popularize following protective measures to your colleagues and lab members.

Protective Measures

1. Wash hands frequently, and cover your coughs and sneezes.

For preventing COVID-19, please encouraging the "Wash hands" and "Cover your coughs and sneezes" in your lab members.

To post the POSTERS about preventing COVID-19

2. Clean your workspace

If do not clean your workplace, the disinfection will be imperfect. Please clean up your workplace for disinfection.

3. Sanitization and Ventilation

Please sanitization the objects (Ex. door knobs, phones, etc.) you touched at least once a day, and record the sanitization objects in diary of preventing COVID-19. Ventilate your room as often as possible.

4. Check the health condition of your lab members

Please check the lab member's health condition. And if there are any absentees in your lab, please record "Who", "Reason" and "where who visit before 2 days" in diary of preventing COVID-19 if you can.
